

Multidimensional Digital Signal Processing WS19/20

MATLAB Homework Introduction

Organization

- **6** Homework throughout the semester
- **2-3 weeks** time for completion
- Introduction of problems in class
- Discussion of solutions in class

- **For questions:**
 - Post in the forum “Matlab Questions” on Moodle
 - E-mail Basak Gülecyüz (basak.guelecyuez@tum.de)
 - **Lab sessions:** Monday and Friday, 14:00-18:00, Room 0943

Organization

- Each homework includes:
 - **A Questions:** Quiz on Moodle
 - **C Questions:** Coding Assignments on **MATLAB Grader**

- Unlimited number of submissions, last submission counts!

Organization

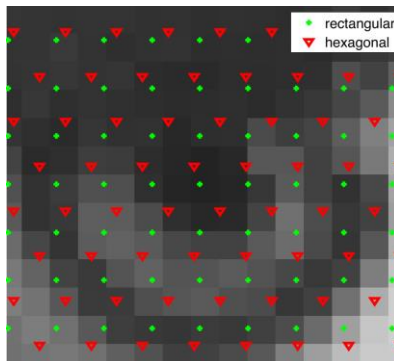

- **Bonus:** If you achieve overall 65% of the points you get a bonus of 0.3 in your grade, assuming you passed the exam
- Please register to the course to have access to:
 - **MATLAB Grader**
 - **Room 0943**
- **MATLAB Introduction:** Friday 18/10 14:00-18:00 and Monday 21/10 14:00-18:00

Homework Content

- **HW1:** Image Manipulation and Periodic Sequences

- **HW2:** Image Sampling and Filtering

Homework Content

- **HW3: DFT and Block Transform**

- **HW4: DCT and KLT Transformations**

Homework Content

- **HW5:** Autoregressive Models and Pyramids

- **HW6:** Subband Decomposition and Lifting
